Microsoft SharePoint (Developer, Administrator) including BI Features: Dashboard, Scorecard, KPI
IT Project Management

experience

 MAR 2010 - NOW **JN General Insurance Company Limited**

JNGI Online - developed online platform tool to allow customers of JNGI (new and existing) to get a quote, purchase insurance, renew their policy, and submit a claim

 ASP.NET  SQL Server  HTML, JS, CSS, Bootstrap, jQuery

Microsoft SharePoint - developed Corporate, division and department websites to facilitate tasks, issue tracking, collaboration, document sharing, and Business Intelligence (Dashboards, Scorecards, KPIs)

 Microsoft SharePoint 2016, SharePoint Dashboard Designer, PowerView 
Microsoft Project, Excel, Visio, Word, PowerPoint

Datawarehouse Development - develop data warehouse using Microsoft BI Stack for core business systems: Insurance, Microsoft Dynamics SL (Accounting) and other small sub-systems used in the organization

 SQL Server, SSIS (ETL), SSAS Tabular, SSAS Multi-dimensional  Microsoft
Visual Studio (SSDT-BI)  Microsoft Excel

Management Report Development - developed reports for the management team at all levels. Reports include key metrics used by the business to help drive the decision making process. Quality checks, automation and cleansing of data was done were required. Different reporting tools are used based on the situation. Descriptive, prescriptive and predictive reports were delivered, and in complex cases, users are shown how to interact with and use the report data. Report data came from multiple sources including: DataMart, Excel Files, Online Data, Insurance Industry Data.

 Microsoft SharePoint, SharePoint Dashboard Designer  Microsoft Power BI
Desktop  Microsoft Excel (PivotTables, Charts)  Tableau

Premium Calculator (Broker Portal) - developed an online based portal that would allow insurance brokers/agents to generate motor insurance quote for their customers

 ASP.NET  SQL Server  HTML, JS, CSS, Bootstrap, jQuery

Premium Calculator - developed a centralized app to generate motor insurance quote for JNGI customers, and have the information integrated with the core Insurance system. This application was established as a platform for external applications to later share and communicate data (JNGI Online, Broker Portal)

 SQL Server  Microsoft Visual Studio

Customer Service Database - developed an application for Customer Service department to help managers and supervisors track service time, to more effectively and efficiently monitor and assign resources accordingly

 ASP.NET  SQL Server  Microsoft Visual Studio  HTML, JS, CSS, Bootstrap,
jQuery

 SQL Server
Management Studio
(DB, SSAS, SSIS)

 Microsoft
SharePoint,
Dashboard Designer

 Tableau

 Power BI
Desktop

 Microsoft Office
Suite (Project, Visio,
Word, Excel,
Access, PowerPoint)

Staff Referral Rewards Program - developed an internal online application that allowed staff members to refer persons to the company and get a commission for each converted prospect

 ASP.NET  SQL Server, SSIS (ETL), SSAS Tabular  Microsoft Visual Studio
(VS, SSDT-BI)  Microsoft Excel

IT Project Management - played a key role in the success of the following Projects: JNGI Online, Premium Calculator, Staff Referral Rewards and Data Warehouse. Roles included: creating and monitoring Tasks (WBS), attending meetings with subject matter experts (SMEs) and key stakeholders, gave consultation with the decision making process, update documentation for Change Management, create and present Process Flow Diagrams, monitor progress updates from resources to ensure project timelines are met

 Microsoft Project, Visio, Word, Excel, PowerPoint

System Automation - develop SSIS Packages using ETL tool to automate simple business processes in order to improve operational efficiency and customer experience. Processes include: sending automatic SMS messages to customers using a SMS API, sending automatic HTML emails to customers based on SQL Report data and predefined conditions

 SQL Server  Microsoft Visual Studio (SSDT-BI)  Microsoft Excel

Web Services Integration - integrated web services from Government with key internal systems to improve data quality, integrated Gateway Provider API with JNGI Online to facilitate credit card transactions

 SQL Server  Microsoft Visual Studio (VS, SSDT-BI)  Chrome REST API Client
(testing), Web Services (JSON, SOAP, RESTful)

User Training & Support - created user manuals for staff and operators. Prepared presentations that outlined system use, system features. This included training for super-users who would then train any new staff and respond to simple queries. Provide technical support for users who have difficulties using the internally developed systems.

 Microsoft Word, PowerPoint

education

2013 - 2015 MSc in Information Systems , Northern Caribbean University

2005 - 2009 BSc in Information Technology, University of Technology

training

IT Project Management

Developing a Datawarehouse with Microsoft SQL Server (Tabular, Multi-Dimensional)

Microsoft SharePoint 2010, 2013, 2016

Android Development

Google Analytics, Adwords

side projects

Topical Bible - an android app that gives you everyday topics from a Biblical perspective

 Android  SQLite

Nyaamingz - an online restaurant for purchasing lunch with realtime notifications and delivery tracking

 Android  Firebase
